Vehicle Monitoring AI Model

Your Name

May 3, 2023

Introduction

- Overview of the problem of vehicle monitoring
- Explanation of the need for an AI model

Data Collection

- Description of the data sources used
- Explanation of the data preprocessing techniques

AI Model Architecture

- High-level overview of the AI model architecture
- Explanation of the different layers and their functions
- Discussion of the choice of activation functions and loss functions

Results

- Presentation of the results obtained from the AI model
- Comparison of the model performance against other methods

Conclusion

- Summary of the project and its significance
- Future work and potential areas for improvement
